

CLARIFICATION, CONCLUSION AND RECOMMENDATION
FOR THE POSITON OF COMMUNITY HEALTH OFFICERS, NHM, MP
WRITTEN TEST HELD ON JUNE 27, 2021 (IN TWO SHIFTS)

#	Question Id	Question Description	Paper & Shift	Options	Query By a Candidate	Ref Attached (by Candidate)	Clarification, Conclusion and Recommendation from SME and Review Committee of SAMS
1	103	The function of flame cell is	Paper-1 (Shift-I)	409:Excretion / मलत्याग 410:Digestion / पाचन 411:Respiration / श्वसन 412:Reproduction / प्रजनन	Problem in Hindi Translation	N/A	As per the instruction provided on the computer screens of the candidates before starting the examination, it was clearly mentioned that in case of any discrepancy exists between the Hindi and English Question, the English version of a question shall be considered correct. Hence, it is concluded that no further changes and correction is required.
2	116	The constant presence of a disease or an infectious agent within a given geographical area is called	Paper-1 (Shift-I)	461: Pandemic / सर्वव्यापी महामारी 462: Epidemic / महामारी 463: Endemic / स्थानिक 464: Sporadic / स्पोराडिक	As per the candidate right option should be 463	https://qm.samshrm.com/Uploads/Exam/637606932768854992.jpeg	Review committee concluded that the Question is correct and the right answer is Endemic (Option ID: 463). Also, the review committee recommended that One (1) mark shall be awarded to all the candidates who have given their response as Endemic (Option ID: 463) for the question.
3	124	The thin serous fluid secreted from breast during the first 24 to 48 hours is called	Paper-1 (Shift-I)	493: Foremilk / अग्रभाग 494: Hind milk / हिंद दूध 495: Colostrum / कोलोस्ट्रम 496: All of these / ये सभी	Colostrum is thick yellowish milk not thin serous hence question is wrongly placed	https://qm.samshrm.com/Uploads/Exam/637606799278006251.jpg	Kindly refer to "Essential of Paediatric Nursing" which states "The serous fluid secreted from the breast in the first 24 to 48 hours is only colostrum" The other options don't have similar characteristics but they are good distractor. Hence, SME concluded that no further changes and correction is required.
4	150	The virus that causes dengue is	Paper-1 (Shift-I)	597: Arbovirus / अर्बोवायरस 598: Flavivirus / फ्लेविवायरस 599: Retrovirus / रेट्रोवाइरस 600: DNA virus / डीएनए वायरस		(1) https://qm.samshrm.com/Uploads/Exam/637607406263235573.jpeg (2) https://qm.samshrm.com/Uploads/Exam/637607467248530435.jpg (3) https://qm.samshrm.com/Uploads/Exam/637606757557129133.jpeg	Kindly refer K.Park Community book and a weblink https://www.cdc.gov/vhf/virus-families/flaviviridae.html that the virus that causes dengue is flavivirus. Hence, SME concluded that no further changes and correction is required.
5	171	When a child is in acute phase of nephrotic syndrome, which of the following is an essential measure the nurse should take	Paper-1 (Shift-I)	681: Urine dipstick to be done every hour / यूरेन डिपस्टिक हर घंटे की जानी चाहिए 682: Measure abdominal girth every two hours / हर दो घंटे में पेट का घेरा नापें 683: Check hematocrit value every 12 hours / हर 12 घंटे में हेमटोक्रिट मूल्य की जांच करें 684: Weigh the child daily / रोजाना बच्चे का वजन करें	Question ID = 171] 1. Urine dipstick to be done every hour / ?? ?? ????? ?? ?? ????? ????? [Option ID = 681] This is correct answer , I have provided reference of book - Davidson's principal and practice of medicine 20th edition- Page no 468	https://qm.samshrm.com/Uploads/Exam/637606845856272129.jpg	Kindly refer book Wong's page no 960, Nephrotic syndrome, weight to be monitored daily. There is no protocol to do urine dipstick <u>hourly</u> . Nephrotic syndrome weight has to be monitored daily, urine dipstick once in every shift or as per hospital protocol: Hence, SME concluded that no further changes and correction is required.

#	Question Id	Question Description	Paper & Shift	Options	Query By a Candidate	Ref Attached (by Candidate)	Clarification, Conclusion and Recommendation from SME and Review Committee of SAMS
6	174	The diagnosis of a patient assigned to the nurse is right sided heart failure. Which of the following condition a nurse can expect while assessing	Paper-1 (Shift-I)	693: Peripheral edema / पेरिफेरल इडिमा 694: Decreased urinary output / मूत्र उत्पादन में कमी 695: Shortness of breath / सांस लेने में कठिनाई 696: Seizure activity / दौरे की गतिविधि	A physician can determine if any of the following symptoms are being caused by right-sided heart failure: Awakening at night with shortness of breath Shortness of breath during exercise or when lying flat Fluid retention causing swelling in the ankles, legs, feet, and/or abdomen both options 695 and 693 both are correct	https://qm.samshrm.com/Uploads/Exam/637607346558119594.jpg	Kindly refer K.Park Community book and a weblink that https://www.heart.org/en/health-topics/heart-failure/what-is-heart-failure/types-of-heart-failure that peripheral edema is right answer for the question. Nurse expect to assess the Peripheral edema for patient with right sided. Ideal distractor is shortness of breath seen in left sided heart failure. Hence, SME concluded that no further changes and correction is required.
7	192	National Mental Health Policy of India was launched in?	Paper-1 (Shift-I)	765: 1982 / 1982 766: 1987 / 1987 767: 1994 / 1994 768: 2014 / 2014	The National Mental Health Policy has been prepared on the basis of the recommendations made by the Policy Group on Mental Health constituted by the Union Government in April 2011. National Mental Health Policy of India was launched in? the right option is 768 (2014)	N/A	Review committee concluded that Question is correct and right answer is 2014 (Option ID: 768). Also, review committee recommended that 1 mark shall be awarded to all the candidates who have given their response as 2014 (Option ID: 768) for the question.
8	195	A technique of repeating the main message expressed by the nurse is called as	Paper-1 (Shift-I)	777:Listening / सुनना, 778:Restating / फिर से कहना, 779:Clarification / स्पष्टीकरण, 780:Reflection / प्रतिबिंब,	GIVEN ANSWER IS WRONG	Ref Link not provided by Candidate	Kindly refer Gopichandran, Kanniammal, Essential of communication and education technology (2019),CBS publishers page no. 85 that "Restating" is a technique of repeating the main message expressed by the nurse. Hence, SME concluded that no further changes and correction is required.
9	201	Tone of voice, facial expression and body language belongs to which type of communication	Paper-1 (Shift-I)	801:Verbal / शाब्दिक, 802: Non verbal / अशाब्दिक 803:Formal / औपचारिक, 804:Structured / संरचित,	TONE OF VOICE RELETED TO THE VERBAL COMMUNICATION AND FACIAL EXPRESSION OR BODY LENGUGAGE RELETED TO NON VERBAL COMMUNICATION	https://qm.samshrm.com/Uploads/Exam/637606689501221140.jpg	Kindly refer Potter and Perry chapter on communication and Gopichandran, Kanniammal, Essential of communication and education technology (2019), CBS publishers page no 52 that Tone of voice is non verbal and the exact words spoken is verbal form. Hence, SME concluded that no further changes and correction is required.
10	241	Vitamin A supplement is given under reproductive and child health programme for children upto the age of	Paper-2 (Shift-2)	961:1 year/ 1 वर्ष, 962:3 years/ 3 वर्ष, 963:5 years/ 5 वर्ष, 964:5 years/ 5 वर्ष,	Both options are correct #241 Mene jo correct kiya hai, answer key me galat hai Please consider my answer Thank you	N/A	A typographical error has been made at the end in compilation of the question, consequently both last option became similar. hence review committee concluded with a recommendation of scrapping this question and award of 1 marks to each candidate who has attended the online written test in shift-2.
